Andrew Webster of IGN gave the game a 7.5/10, stating that despite its flaws, "Rust" was one of the few games providing a dynamic, open world survival experience on the PC. He went on to say that even though he believes the game may not appeal to everyone due to its in-your-face realism, he still encourages other fans looking for such a game to try it out.",

The primary task is to craft weapons, beginning with only a rock and a torch as tools at the beginning of the game. Once enough resources are gathered, tools such as pickaxes can be made in order to speed up collection of resources which are spread randomly across the map. These resources include wood, stone, metal as well as a variety of gas canisters and cloth/thread. Later on in the game, electricity can be generated by large generators requiring the same gas canisters found earlier in the game.",

There are many different types of multiplayer games that you can play on Minecraft. Some types of servers are: Survival Servers: In Survival Servers, you have to survive on the land for as long as possible without the knowledge of other players in the

world. There are things called "npc" which stands for Non Playable Characters. These characters give out challenges and objectives that will give you rewards and help progress you through the game, but there is one huge catch... You are visible to other players if you make a noise or break certain blocks. If you are the first person at the location upon joining then it will be yours. If another player sees that first person breaking fences and trees and decides they want to claim ownership, they can kill them and then take ownership of that location. In a Survival Server, you will be given an item called "Permission Node" which allows you to see where other players are on the server. These items are very rare and can only be obtained by doing some specific tasks in game such as going through long distances or through many different biomes, etc. Creative Servers: In Creative Servers, players can build anything they want with real-world objects inside the game. There aren't any rules, so you can build anything that your imagination can think of. You can build houses, villages, and even dungeons for people to explore; and if you ever get bored of your creation you can destroy it and start over! Mini Game Servers: These servers are focused on playing mini games in order to win rewards. In a mini game server, there will usually be an objective that the players have to reach in order to win a prize. There are many different types of mini games: Sky Block Servers: Players have to survive on floating islands.",
