The game was originally named "Pixelmon"™ by the creator of Minecraft, Markus Persson (also known as Notch). It was inspired by crafting games like Little Big Planet and the popular multiplayer game World of Warcraft. Minecraft, like World of Warcraft, is a game that is played in a virtual world. It does not have a storyline or character progressions like most RPGs do. Instead, Minecraft offers players the possibility to build almost anything they want. You can create the same things that you see in Minecraft with your own imagination and creativity.",

The gameplay in Minecraft is great, but nothing can beat the feeling of being able to make a zombie run through a field with a machine gun and shoot your friends. There are no rules in Minecraft, which means that you can do whatever you want. Although it is tempting to download those mods that will let you kill your enemies, or add more weapons in the game, it is not recommended because it can be hard to tell which mods are safe to download. Plus, you could end up with some malware on your computer if you don't know what you are doing. It is much better if you choose mods that add something else to the game instead of changing how things work. In my opinion, one of the best mods to download would be N.P.C (non-playable characters) mods. The mod is basically a bunch of programs that you can add to your game, and they will make it much more interesting than it already is. There are plenty of N.P.C mods out there, but one I have found to be very interesting is the Steve mod. The Steve mod allows Minecraft characters (like the player) to run around on their own and move in any direction they want " all you have to do is give them a path to follow by making blocks for them to walk on.",

When creating a custom modpack, there are many different things you can do to give your server an extra edge over other servers or creative mode servers. Players can also use these mods on servers that aren't part of the official Minecraft community if you decide to share and give them access to them.",

The game utilizes a block-based mining and crafting system. As in Minecraft, players can gather resources such as blocks of wood, stone, ores, plants, and foodstuffs from the environment to use in crafting. While players are able to craft a variety of basic weapons such as axes and swords using these materials, they will need to gather blueprints for advanced items such as firearms and explosives. The game features combat between players where every player has access to health regeneration; this prevents battles from lasting indefinitely and makes it more viable for players to attack each other with melee weapons instead of guns.",

Most weapons can be crafted using a combination of two items from the metal and wood category. For example, a pickaxe is constructed from a stone pickaxe and a piece of metal, and is more powerful than both types of weapons combined. It has an increased durability when compared to stone or metal alone but it also takes longer to craft as well as requiring more resources than either a stone or metal item would by themselves.",
